

Example: John Smith would enter: jsmith.acs

Step 1 - Go to this address: <http://www.studyisland.com>

Step 2 - Enter username which is the first letter of your first name and your last name, dot (.), acs

Password is: alianza

Step 3 - On the Home Page in the left column where it says programs select the students Grade Level

Step 4 - On the next page under Select a Subject, select Math or Language Arts (though you are welcome to use either of the other two selections as well)

Step 5 - (using LA as an example) On the line near the top that says # Grade - CA Content Standards Mastery, move to the right and click the button that says: " Start Studying"

Step 6 - There are different options available, but for now leave the choices as they appear: "Test Mode" and "10 questions" - Press the "Next" button.

The program will automatically generate a new test for the student.

I would recommend you try it out yourself to see how it works so that you can guide your students.
